

Your CU*Answers Invoice. Explained

Introducing the Accounting Website: Everything You Need to Know About Your Invoice

Imagine you've just gone to your local coffee shop and order a caramel macchiato. You turn to your barista and ask, "Can you please tell me what makes up the price of my drink?" Even if they knew, they wouldn't tell you. Your CUSO is different: we're ready to tell you everything we can, down to how much you're paying for the beans.

We are proud to introduce the new CU*Answers Accounting website, accounting.cubase.org.

This site has been designed with you, the client, in mind and we hope it will provide useful information for you. Suppose you see a billing code on your invoice that you don't recognize, or you'd like to prove out that you were billed for the correct number of active members; simply check out the Accounting site to learn about every billing code. For items generated via CU*BASE, you will even be able to find detailed instructions on how to reconcile those items to data in CU*BASE!

In addition to all the information you can find on each billing code, we've provided you with quick and easy access to our Pricing Guides, information on making your payments to CU*Answers via ACH, and a news section where you can keep up to date on any accounting specific changes!

The screenshot shows the CU*Answers Accounting website. At the top, there's a navigation bar with links for 'My Invoice Explained', 'Pricing Guides', 'ACH Info', 'FAQ', and 'Contact'. A search bar is prominently displayed. Below the navigation, there's a 'Welcome' section with a brief introduction to the site's purpose. To the right, there's a 'SERVICE THAT ADDS UP' graphic. The main content area features three columns of 'Accounting News' and 'Billing Codes' with various updates and links. At the bottom, there's a footer with copyright information and a 'Proud Member of the Quaterlink.com Network' logo.

We'll continue to work towards a bigger and better site, with more information to make your invoice reconciliation an easier job, and we'll keep driving what's become a very unique CUSO experience: a transparent and interactive site for driving the development of pricing models by including everyone, right down to the bean counters.
