DataBP

IRONCLAD

BACKUP & DISASTER RECOVERY SOLUTIONS

Continuous Data Protection Solutions

You know you have to backup your data but it's a headache managing tape. There are numerous online and tape-free alternatives, but who should you trust with your critical data? Look no further than WESCO Net, the same company hundreds of credit unions trust every day to secure over $5B in data assets.

WESCO Net's *DataBP* features state-of-the-art technology including high-speed disk-based Network Attached Storage (NAS) solutions to provide continuous data protection backups as frequently as every 15 minutes for rapid data recovery and multiple restore points.

Available offsite data storage at redundant high-availability data centers provides advanced protection even against the physical loss of your servers or facilities.

Instant Virtualization technology can bring failed servers back online in as little as 30 minutes.

DataBP Key Features:

- Continuous Data Protection (backups as often as every 15 minutes)

- Instant Virtualization technology can bring your server back online in as little as 30 minutes.

- Advanced support for SQL Server and Exchange

- "Bare-Metal" system recovery even to dissimilar hardware

- Low-cost optional off-site storage of backups

I sleep so much better knowing my data is protected with bullet-proof backup technology from WESCO Net.

DataBP

Your Data is Always Secure

FIPS approved industry-standard 256-bit AES Data Encryption means your data is always protected and only you have access to it.
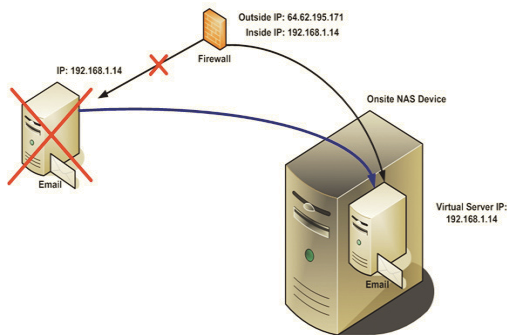

Continuous Monitoring

Continuous Monitoring and Management by WESCO Net's Network Operations Center means you can rest easy. We respond automatically to alerts to ensure your backups are executing as planned.

Optional Secure Offsite Storage

Layer your data protection with secure offsite replication of your backups using 128-bit TLS and 256-bit AES encryption.

Near Instant Server Virtualization

Virtualization technology allows recovery of failed servers in minutes. Get your staff back to work right away instead of waiting hours for tapes to restore.
