**waypoint**

# The Future with CBX

- The foundation is finally here...so, what's next?
- Building something that GOLD couldn't
- Utilizing features GOLD couldn't
- Move faster than GOLD could while staying safe
- Opening up for our future

on the trail

# Building Smart: Safety First

- Before we jump to construction
  - We want to know what we can and cannot do
  - Experimenting, assessing tools in our toolbox
  - Research what's available
    - Third party API vendors
    - Software libraries
  - Designing both short & long-term vision (blueprint)

# Moving Fast

- Speed matters
- Start small and move carefully
  - Security remains top priority
  - Measure twice, cut once
  - Track wins and losses, adjust, then pick up speed

# Your Ideas Matter

- We have already started brainstorming our next steps
- We want your voice in remodeling our future house
  - Have an idea? Let's talk
  - Want to be part of the change? Get involved
  - Let's build something great together
