

22.10

Imaging Solutions Software Release

Beta	Online	In-House
9/7/2022	10/9/2022	10/9/2022

What is this release?

This release is the Imaging Solutions release for online, enhanced online, and in-house release managed clients. Some features do not apply to all three types of clients. Refer to the symbols within the document for details.

How do I get this release?

 **In-House Managed Clients:** Imaging Solutions will be contacting you to schedule the update of your system for this release starting October 9th, 2022.

Have an in-house imaging server, but are not a Release Managed client? Sign up for Release Management today and we will waive the fee for the first year! Other options are also available. Contact Imaging Solutions for details at imaging@cuanswers.com.

 **Enhanced Online/Online Clients:** Imaging Solutions will deploy your release on October 9th, 2022. Any added features can be purchased in the store at store.cuanswers.com.

 -    Updates to MySQL and PHP 2
- Software Versions 3

Native Receipts

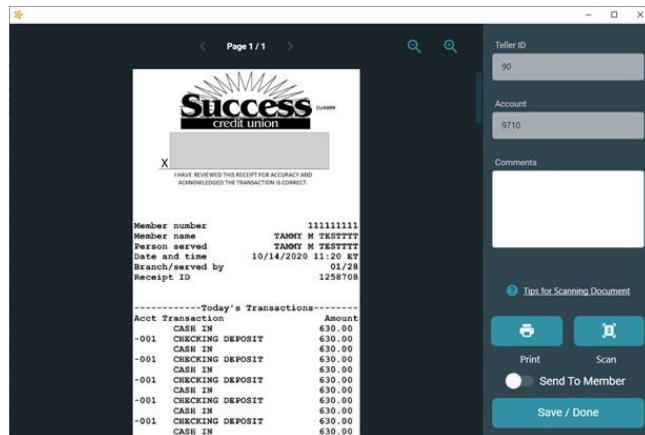

(Active Beta) Native Receipts in Xpress Teller

With Native Receipts, our Imaging Solutions developers have created a new, lightweight receipt processing application. Available first with Xpress Teller, this application allows tellers to view, sign, print, and archive receipts, replacing all the functionality currently performed by ProDOC for receipts. *To use Native Receipts, you must use the vertical receipt format.*

Features

- Modernized look and feel.
- Saves logo with receipt so reprint from iDOC Vault includes this information.
- Optionally send receipts to member storage in **It's Me 247**.
- Account balances will be printed on receipts to match the point in time when the receipt was printed.
- No need for a receipt print session.

An additional benefit of this solution is that it will become part of the core. Instead of a print session tossing the receipt over the fence to a third-party imaging system, we'll be using data directly from CU*BASE to construct and archive the receipt using our own solution. **We'll write it, we'll own it, and we can innovate on it.**

Workflow Controls

New Xpress Teller workflow controls will give credit unions more options for how receipts are produced, including allowing you to mask the account number and name on the printed copy and determine whether to signal the teller to capture a signature only when a withdrawal is made.

Interested in Native Receipts? Check out the Imaging Solutions store page for this feature.
