

CBX Leadership Dashboards

Tools that provide a window on your credit union's day-to-day operations...
Tools that every credit union leader should be familiar with

CBX dashboards let you keep a close eye on every area of your credit union's operations, and they do it with robust graphical tools that help to clarify your message and give it punch. Several dashboards include Visual Analytics Tools (VAT) that will help with the addition of charts and graphs to allow you to more easily explain the data on the screen.

CU*Answers and CBX will have the most extensive and comprehensive Visual Analytical Tools on the market today – more points made through visuals that grab the audience and make the consumer's grasp of information undeniable. Our hope? This suite of visual analytical tools will help all data analysts grab some attention – you need presentation graphics that catch an audience's eye and communicate information without distraction. [Learn more.](#)

CBX export features allow you to get the most from your data! Use the PDF () button to generate a high-quality PDF summary of the dashboard contents including charts and graphs, including Virtual Analytics Tools (VAT), ready to present to your Board or other team members.

(Special PDF export software is required; contact a CSR for information about purchasing this inexpensive software for your CEO's workstation.)

Use the Excel () button to export the dashboard contents for use with a spreadsheet application. Use the CSV () button for a .csv (comma-separated value) export.

Management Analysis Dashboards

10-Year Trends by GL Account <i>Tool #1011</i>	Get a big-picture view of how your G/L balances have been trending over a 10-year period. Learn more.
