Data to support your business plan, track teller activity, and to design your lending strategy to better serve your members

CU*BASE Management Dashboards

The management dashboards in CU*BASE are designed to assist credit union officers in tracking interactions and discovering product preferences of their membership. Use the dashboards to analyze membership data, teller transactions, and lending statistics to see trends and performance of products and services.

This brochure serves as a big picture overview to give you a snapshot of the depth and breath of tools available to your leaders.

Management Dashboards

More and more, management wants to "Get to the Answer" of the most important questions they have, with clear data to back up the answer. CU*BASE includes many dashboards designed to assist management to get to key information needed to make strategic decision to move their credit union forward.

The Open/Closed Membership and Accounts dashboards allow you to do a deep-dive analysis of a group of members, such as your members at one branch. Analyze features of the members, such as their gender and zip code, and data on their accounts, such as month opened.

The 5300 Call Report Ratios dashboard calculates key NCUA financial ratios using data from your existing CU*BASE Call Reports

Use the Where Your Members Borrow dashboard to see with which financial institutions your members have loan so you can offer better rates. Sampling of Management

Dashboards

Management Dashboards

How do you retain your existing members while attracting people who have not yet joined? How is money moving through your credit union; how might that affect the decisions you make on how to move forward? How does the way you have implemented your fee and fee waiver program affect your bottom line? Which members have the largest impact financially with your credit union? CU*BASE has dashboard to answer all of these questions.

Raise the Bar on Your Reports

No more multiple applications to create your executive and management reports. From CU*BASE to your desktop in seconds and with just one click.

CU*BASE clients have the ability to export data and charts to Adobe's PDF file format. The PDF export is for you to provide attractive single click data and charts in a format that's ready to print and distribute to a credit union board and management staff.

In addition to PDF Exports, CU*BASE also offers the functionality to export data and charts to a spreadsheet application, such as Excel. No additional software is required for these exports.

PDF Exports do require the installation of an additional software at a minimal expense. Contact Client Services for details.
