

Cybersecurity - Is your Credit Union ready?

Cybersecurity is a serious economic concern rapidly spreading throughout the credit union industry as the risk of data breach and fraud continues to increase.

Credit unions are encouraged to design and build the infrastructure needed to continually monitor and enhance the security of their systems and to protect member information.

Cybersecurity Consulting Engagements

AdvantageCIO has consulting engagements designed to help you assess and improve your credit union's cybersecurity readiness including:

- 🔒 **Cybersecurity Assessment**
- 🔒 **Information Security Risk Assessment and Program Development**
- 🔒 **Strategic Technology Planning**
- 🔒 **Education for Staff, Senior Management and Board of Directors**
- 🔒 **Ongoing Cybersecurity Compliance Management**
- 🔒 **Disaster Recovery and Business Continuity Planning**

Our team of security professionals has over 30 years of consulting experience. We're already working with many of your credit union peers to meet the challenges that cybersecurity presents.
