Writing Team: Tricks of the Trade
## January Top Picks: New CU*BASE Navigation
Issue 62

Be sure to attend the upcoming Tricks of the Trade webinar on January 31 from 3:30-4:00 PM ET. Watch for an invitation via email. Learn about where to go to find resources to learn about the new CU*BASE navigation coming with the 17.03 release.
Pick #1: Where can I find resources to learn about the new CU*BASE navigation changes coming with the 17.03 release?

With the 17.03 release, the CU*BASE menu structure is being replaced with an easy-to-search Tools Home page. The best way to learn about the release and the new CU*BASE navigation changes is to go to the "Revamping the CU*BASE Menu System" section in the CU*Answers Kitchen. On this page you will find all of the resources covered in this publication as well as answers to frequently-asked questions.

Pick #2: Where can I find a video that gives an introduction to the new navigation? Where can I find other videos?

CU*Answers has worked overtime to provide you with quality videos to introduce you to the new CU*BASE navigation. On the Kitchen page you will find an introduction to the new navigation feature and many other helpful videos.

Other videos help you learn about tools, the button bars, toolset controls, favorites, and preferences.

Pick #3: Where can I find the PowerPoint used in the new CU*BASE navigation training?

Want to review the PowerPoint used in the 17.03 release training? Look no further than the Kitchen page. There you can find it both in PowerPoint and PDF versions. Review it yourself or use it to train your staff!
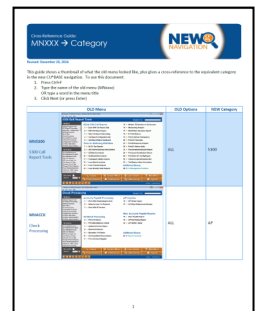

Pick #4: Where can I find a cross reference guide for the old menu option to the new navigation?

We have created an easy-to-use cross reference Excel spreadsheet that lists each menu option and the new tool number assigned to it. Find it on the Kitchen page.

Pick #5: Where can I find a cross reference guide for MNXXXX to the new "category" feature?

Instead of menus, new "categories" group the tools in the new navigation. Find a handy cross reference of menu name to category on the Kitchen page.
