

CU*BASE Downloads to Raddon

Downloading Data from CU*BASE to Raddon

CU*Answers has worked directly with representatives from Raddon Financial Group to develop a system where CU*BASE member data can be downloaded for use by Raddon tools. For those credit unions that have already developed a relationship with Raddon, this new optional service will make it easy for you to provide the needed files, on any schedule you wish.

What data is downloaded?

This download is designed to provide Raddon with the data required by its “CEO Strategies” program ONLY. If Raddon has developed a custom program for you, you may not be able to use the download. This download option will include two files according to Raddon specifications:

- The General MCIF File
- The Checking Account Activity File

Included in the files are all of the required fields requested by Raddon. However, non-required fields which are not stored on the CU*BASE platform will not be included. (A complete list of fields can be provided upon request.)

Can any End-of-Month file data be used?

Data from any available End-of-Month file can be used with the Raddon download.

Costs

The cost for the downloads will be as follows:

One time implementation fee..... \$1,000.00

*Includes implementation of required files and software on your credit union's custom CU*BASE menu.*

Annual maintenance \$250.00

The annual maintenance will include changes to the file format. Additions of fields and other information to the file will be billed at our normal programming rate.

After the initial implementation setup is complete, handling the actual downloads to Raddon will be your credit union's responsibility. The downloads can be done using the same procedure as the AIREs download process, where files are downloaded from the iSeries and copied to your PC, then the PC file is sent to Raddon according to their instructions. Complete instructions will be provided as part of your setup process.

Remember...The same data that is sent to Raddon is already available to your credit union online using the new CU*BASE “Knowing Your Members” relationship management tools. You don't need the download to take advantage of these powerful tools.

Refer to the separate booklet on our website for details!
