

## Putting Every Credit Union in The Document Transfer Business

By creating free member drop boxes in **It's Me 247**

### 1. Credit Union with Business Member

The credit union sends the business member a notice for the annual update. The business member uploads the financials, tax returns, collateral items, etc. into My Virtual StrongBox so the credit union can view these documents.

### 2. Credit Union with Dealership

The indirect dealer partner sets up an account with the credit union. The credit union shares funding reports and details of funds deposited into corresponding accounts via My Virtual StrongBox.

### 3. Credit Union with Participation Investor

The investor opens an account at the credit union with the credit union, and that is where funding dollars are sent. The credit union then uses My Virtual StrongBox to send the investor reports that detail and track loans in which they have invested.

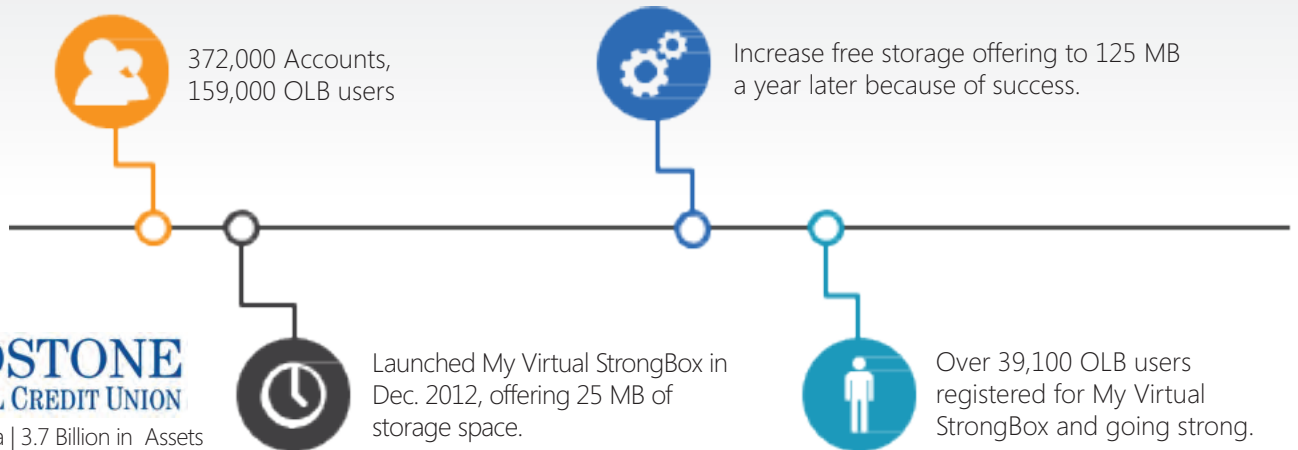

### 4. Credit Union with Member

The credit union can use My Virtual Strongbox as a vehicle to improve communication with a member in countless ways including: sending loan documents for signature, delivering disclosures, and delivering receipts.

### 5. Member For Personal Use

The member can use My Virtual StrongBox as an online safe for critical documents such as medical information, will/ trust information, and tax/ financial records.
