

Safe and convenient for your members. Cost effective for you.

## Give your members free cloud storage from the comfort of It's Me 247 with My Virtual StrongBox.

### What is My Virtual StrongBox?

My Virtual StrongBox is a secure online safe deposit box where your members can store their sensitive documents such as wills and loan forms. Conveniently accessible from within It's Me 247 via a Single Sign-On (SSO), members can also receive secure documents, like e-receipts, sent by your team from ProDOC, and receive an email notification when it arrives. Your members can even share their documents with others by sending a secure link.

### Get started at no cost to your credit union

For a limited time, CU\*Answers will provide every credit union client with the Standard package, which includes 10 MB of storage space for each member—about enough space for a loan package and a dozen receipts. For additional features, including the ability to earn from selling members more storage space, Premium packages are available—pricing from Virtual StrongBox available on the back.

### Learn more at our website

For more information, including how files are secured and a feature comparison for Standard vs. Premium editions, visit us on our website.

### Sign up today

To get started, fill out your contact information in the space to the right and the CU\*Answers agreement included with your packet and send to: Julie Gessner, [jgessner@cuanswers.com](mailto:jgessner@cuanswers.com), 800-327-3478 x131.

### CU\*Answers

6000 28th Street SE Grand Rapids, MI 49546  
(800) 327-3478 [cuanswers.com](http://cuanswers.com)

### Implementation timeline

The whole process typically takes 7-10 business days based on calendar availability and live date selection (Wednesdays only).

- Credit union sends signed contract to CU\*Answers
- CU is introduced to Virtual StrongBox team; VSB contacts CU for implementation and training
- Once VSB process is complete, VSB notifies CU\*Answers to proceed with activation
- My Virtual StrongBox is activated for testing and final implementation is performed
- Future: 30 days post implementation, CU\*Answers will follow up with CU to jumpstart feature use
