

## Sending cash has never been easier with Payveris PayItNow

Introducing the most innovative FI-centric offering to facilitate money movement activities!

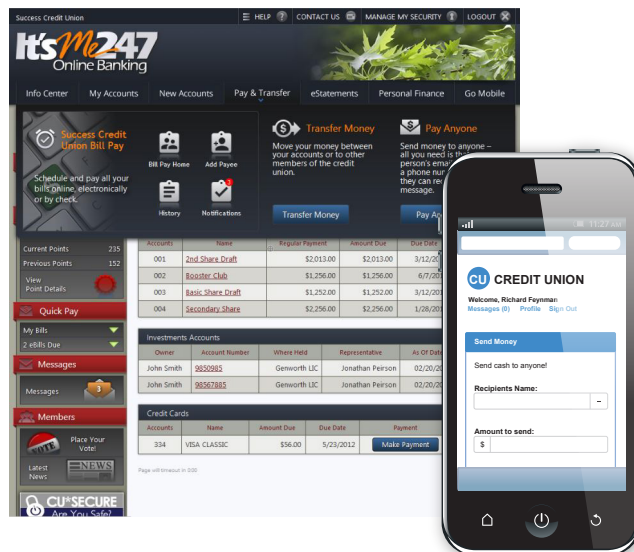

**PayItNow™**, a Payveris product, allows credit union members to send money quickly and easily from their account to anyone's account at another financial institution, using any computer or mobile device.

With the PayItNow person-to-person (P2P) payment service, a member can send money electronically to any recipient via an email address or mobile phone number. The process uses a Paysafe™ "Good Funds" model that is risk free and delivers the money by the next business day.

PayItNow is co-branded with your credit union's brand. PayItNow puts your financial institution in the center of the payments process while giving members a convenient way to send and receive cash directly via their web, mobile, or tablet device.

With PayItNow the process is simple. A credit union member simply provides the email or phone number of the person to whom they wish to send money, and the amount. The recipient is then notified by email or text message that the member is sending them money along with instructions on how to securely accept the funds. Once completed, the funds are electronically transferred and the transaction is complete. It's simple, safe and fast!
