Web Services

## Services Overview

HTML5, CSS3, PHP, Ajax, Content, Search Engine Optimization, WordPress... web development can be a complex process. You have to plan your site content, optimize graphics for web display, and account for the various web browser incompatibilities. Web Services handles all that for you.

*Web Services professionals manage your site updates. You provide the content, and we'll make it work.*

Management Services

## What We Do

CU\*Answers Web Services currently manages over 250 web sites and web applications for various clients. While CU\*Answers Web Services creates specialized web applications using custom developed code, our focus for brochureware sites has been to capitalize on the Content Management capabilities of the popular WordPress platform. WordPress is the same software used to power high-profile companies such as New York Times, Dow Jones, Reuters, Harvard, Rolling Stone and many more.

*CU\*Answers Web Services Is Devoted To Web Standards & Best Practices When Creating New Sites.*
